- Reading

Professional Experience

08/2018 – 08/2020

Sales partner tecis AG

- Leadership of twelve independent sales partners
- Co-design of a german-wide sales interview template

08/2019 – 05/2023

Dual student and IT-Projectmanager at Meyer & Meyer

- Technical lead of a warehousing restructuring project. Holding workshops, overhauling system landscape and optimizing processes. Implementing software that enables the operating technology to work much more efficiently, increases the safety of the technicians and approves the budget for new equipment.
- Technical management of digitalization projects in the transport business area. Provision of real-time traffic maps for the control tower with GPS vehicle tracking. Digitization and (partial) automation of logistic processes.
- Using Power BI to produce comprehensive analyses for various departments such as accounting, controlling and scheduling.
- Development of several web applications. Web-based time recording saving 5-digit costs. Web-based trainee scheduling reduces organizational effort and enables better Onboarding experiences for trainees.
- Operational scheduling activities.

06/2023 – 03/2024

Senior Analyst at Accenture DACH

- Consulting and software development in digital warehousing for an international e-commerce client. Responsible for the design, full stack development and delivery of two software modules.
- Improving development workflows with Azure Continues Integration.
- Promoting technological development through regular presentations.
- Continues development of internal C# libraries.

09/2024 – today

Consultant at Strategion GmbH

- Design, development and deployment of individual AI solutions including RAG and automation solutions.
- Design of an high-level IT-Architecture
- Preparation and execution of AI workshops with local mid-sized companies

Education

08/2016 – 06/2019
